Classroom and laboratory instruction focusing on:

- Food safety and food borne illness prevention
- Chemistry and microbiology of food
- Food safety and public health career pathways
- Field experiences in industry & horticultural settings

2 Graduate Credit Hours
Available

Expected Outcomes for Teachers:

- Increased knowledge about food safety, food science, and career opportunities related to public health
- Lesson plans that integrate current industry food safety and food science best practices into existing courses

A \$1000 scholarship will be provided to each teacher to offset expenses related to travel, graduate tuition and fees, and lodging

To apply, send a brief resume, statement of interest & relevance to professional development, plus a list of courses taught to:
Roberta Robinson at robertar@ksu.edu
Fax: 913.541.1488
Phone: 913.307.7316
Application deadline: May 13, 2011
